Disponibilità: Ottobre 2025 • Full-time • Milano/Remoto • Alta disponibilità trasferte

PROFESSIONAL OBJECTIVE: Recent Computer Engineering graduate seeking first full-time professional role. Hands-on experience in IT system management, automation, and web development gained during studies. Strong technical foundation combined with demonstrated leadership and coordination skills. Eager to contribute to innovative projects in a structured, growth-oriented environment.

Technical Skills

Database & Data Management

- **SQL:** MySQL, PostgreSQL
- Database design and optimization
- API development for data integration
- Data collection automation

Programming & Development

- **JavaScript** (web development, APIs)
- **PHP** (backend development)
- **Java** (algorithms, OOP)
- **Python** (learning, university projects)
- C, Visual Basic/.NET
- **Git** for version control

Cloud & Systems

- **Google Cloud Platform** (basic)
- **Microsoft Azure** (basic)
- Google Workspace (administration)
- Microsoft 365
- Linux/Windows system administration

Tools & Automation

- Google Apps Script
- Workflow automation
- API integration
- WordPress (custom development)
- Trello, project management tools

AI & Productivity Tools

- Claude Pro, ChatGPT Pro
- Cursor IDE
- Effective prompt engineering

Soft Skills

- **Fast learner** - quick adaptation to new technologies
- **Analytical problem-solving** - data-driven approach
- **Team collaboration** - experience in diverse teams
- **Process improvement** - standardization mindset
- **Stakeholder coordination** - multi-level communication
- **Technical communication** - translating complexity
- **Attention to detail** - precision-oriented

Languages

Italian: Native
English: Intermediate (B2)
Spanish: Basic (Erasmus experience)

Education

B.Sc. Computer Engineering

Politecnico di Milano (2020-2025)

- Erasmus: URJC Madrid
- Focus: Algorithms, Databases, Software Engineering, Distributed Systems
- 4 years Student Representative (CUG & CCS Informatica)

High School Diploma - Applied Sciences

IIS "Enrico Fermi" (2020)

- 2nd National Prize - E.E.E. Project (CERN & Centro Fermi)
- WebTV Project Leader
- Student Council Representative (re-elected 2 years)

Professional Experience

IT SYSTEMS COORDINATOR & CO-FOUNDER

2020-2024

Palabrap - Corporate Language Solutions (UK-based Startup)

- Managed technical infrastructure and coordinated IT suppliers for startup development
- Developed automation scripts for data collection and business process optimization
- Administered Google Workspace for distributed team (user management, permissions, security)
- Created and documented standardized workflows and procedures

WEB DEVELOPER & FREELANCER

2018-2024

Freelance Projects (during studies)

- Designed MySQL databases and developed REST APIs for system integration
- Built custom WordPress websites with plugin integration for various clients
- Automated operational processes and business workflows

COMPUTER SCIENCE TEACHER

2023-2024

IIS "Luigi Galvani" - Milan

- Taught Visual Basic programming and computational logic (6 classes, 150+ students)
- Developed curriculum and technical documentation

IT MANAGER & TREASURER

2020-2025

Svoltastudenti - Students' Union, Politecnico Milano

- Managed Google Workspace infrastructure (300+ tenant users, 100+ active)
- Analyzed event participation data for strategic optimization (100+ members)
- Managed cash flows and budgeting for annual events as Treasurer
- Participated in strategic decision-making and event planning

STUDENT REPRESENTATIVE

2021-2025

CUG & CCS Informatica - Politecnico Milano

- Analyzed and optimized university administrative procedures
- Coordinated multi-stakeholder communication (students, professors, administration)

Areas of Interest

- **IT Management:** Team coordination and project leadership
- **Process Automation:** Operational efficiency
- **Cloud Computing:** Distributed solutions
- **Data Engineering:** Pipelines and scalable architectures
- **Best Practices:** Documentation and structured workflows
